

Contents

1	Introduction	3
2	Preliminaries	5
2.1	Basic Notions	5
2.1.1	Example Languages	7
2.2	Automata Theory	8
2.2.1	Finite Automaton	9
2.2.2	Register Automata	10
2.2.3	Universal Register Automata	12
2.2.4	Alternating Register Automata	13
2.2.5	Alternating Register Automata with <i>guess</i> and <i>spread</i>	14
2.3	Regular Expressions	15
2.3.1	Regular Expressions with Backreferences	15
3	Register Set Automaton	16
3.1	Properties	19
3.2	Closure Properties	19
3.2.1	Closure Properties of RsA	19
3.2.2	Closure Properties of RsA _n	21
3.2.3	Closure Properties of DRsA	21
3.2.4	Closure properties of DRsA _n	22
3.3	The Power of Nondeterminism	22
4	Emptiness Problem	23
4.1	Complexity Classes	23
4.1.1	Beyond elementary	24
4.2	Transfer Petri Nets	24
4.3	Proof of \mathbf{F}_ω -completeness of RsA emptiness	26
4.3.1	Reduction from RsA emptiness to TPN coverability	28
4.3.2	Reduction from coverability in TPN to emptiness in RsA	33
5	Determinisation of Register Automata	38
6	Expressive Power	46
6.1	Classifying the Expressive Power of RsA	46
7	Extensions of Register Set Automata	50
7.1	RsAs with Register Emptiness Test	50
